

Jane Doe

Staff Software Engineer

Summary

Distributed systems engineer who ships event-driven platforms. Comfortable from protocol design through on-call, with a bias for measurable latency and cost wins.

Experience

- Built a Go + Kafka pipeline handling 2M events/day and cut p99 latency 40%.
- Led 6 engineers on a TypeScript control plane used by 30 product teams.
- Reduced AWS spend 18% by rewriting a hot path in Rust.

Skills

Go, Kafka, TypeScript, PostgreSQL, Terraform

Education

B.S. Computer Science, State University
